INDEX TO VOLUME 38

ATKINSON, C., see CHAMPION, C. R.

BODONYI, R. J., see KLUWICK, A.

BHATT, B. S., see OWEN, D.

CARBONARO, B., and RUSSO, R. Some Results on Incompressible Linear Hyperelastic Media 507

CHADWICK, P., see UKEJE, E.

CHAMPION, C. R., and ATKINSON, C. Some Screw-Dislocation and Point-Force Interactions with Boundaries for Nonlinear Power-Law Materials 461

COLEMAN, C. J. A Contour Integral Formulation of Plane Elasticity. 485

COWLEY, S. J. Pulsatile Flow Through Distorted Channels: Low-Strouhal-Number and Translating-Critical-Layer Effects 589

CURRIE, P. K., see SMITH, G. D.

DAVIS, A. M. J., and LEPPINGTON, F. G. Scattering of Long Surface Waves by Circular Cylinders or Spheres 411

DAVIS, A. M. J. Axisymmetric Stokes Flow Past a Spherical Hollow Boundary and Concentric Sphere 537

DOLD, J. W. Analysis of the Early Stage of Thermal Runaway . . . 361

DUCK, P. W. Pulsatile Flow Through Constricted or Dilated Channels II 621

ELAD, D., and PARKER, K. H. Application of Lubrication Theory to Flow between Deformable Spheres 47

EVANS, D. V. The Solution of a Class of Boundary-Value Problems with Smoothly Varying Boundary Conditions 521

GARDNER, M., MYERS, C., SAVAGE, M., and TAYLOR, C. Analysis of Limit-Cycle Response in Fluid-Film Journal Bearings using the Method of Multiple Scales 27

GBADEYAN, J. A., see GLADWELL, G. M. L.

GITTLER, PH., see KLUWICK, A.

GLADWELL, G. M. L., and GBADEYAN, J. A. On the Inverse Problem of the Vibrating String or Rod 169

HOWISON, S. D., OCKENDON, J. R., and LACEY, A. A. Singularity Development in Moving-Boundary Problems 343

JONES, D. S. Scattering by Inhomogeneous Dielectric Particles . . . 135

KARAHALIOS, G. T. Boundary-Layer Growth on a Body of Revolution having Translation and Spin 389

KEOGH, P. S. High-Frequency Scattering by a Griffith Crack I: A Crack Green's Function 185

KEOGH, P. S. High-frequency Scattering by a Griffith Crack II: Incident Plane and Cylindrical Waves 205

KLUWICK, A., GITTLER, PH., and BODONYI, R. J. Freely Interacting Axisymmetric Boundary Layers on Bodies of Revolution . . . 575

KRESS, R. Minimizing the Condition Number of Boundary Integral Operators in Acoustic and Electromagnetic Scattering 323

KURASHIGE, M. Equilibrium of a Singular-Stress Surface Appearing in a Fibre-Reinforced Material 267

LACEY, A. A., see HOWISON, S. D.

LEPPINGTON, F. G., see DAVIS, A. M. J.

MARTIN, P. A. Integral-Equation Methods for Multiple-Scattering Problems I. Acoustics 105

MARTIN, P. A. Integral-Equation Methods for Multiple-Scattering Problem II. Water Waves 119

MYERS, C., see GARDNER, M.

OCKENDON, J. R., see HOWISON, S. D.

OWEN, D., and BHATT, B. S. Transmission of Water Waves through a Small Aperture in a Vertical Thick Barrier 397

PAGE, M. A., and RILEY, N. The Free Interaction in a Supersonic Flow over a Porous Wall 79

PARKER, K. H., see ELAD, D.

PASMANTER, R. A. Exact and Approximate Solutions of the Convection-Diffusion Equation 1

PIPKIN, A. C. Some Deformations of Fabrics under no Normal Pressure 175

PRICE, T. C. Slow Linear Shear Flow Past a Hemispherical Bump in a Plane Wall 93

RAWLINS, A. D. A Note on Wiener–Hopf Matrix Factorization . . . 433

REES, D. A. S., see RILEY, D. S.

RILEY, D. S., and REES, D. A. S. Non-Darcy Natural Convection from Arbitrarily Inclined Heated Surfaces in Saturated Porous Media. 277

RILEY, N., see PAGE, M. A.

RUSSO, R., see CARBONARO, B.

SAVAGE, M., see GARDNER, M.

SELVADURAI, A. P. S., and SINGH, B. M. The Annular Crack Problem for an Isotropic Elastic Solid 233

SHAIL, R. A Note on the Capacity of a Bitoroidal Capacitor 157

SINGH, B. M., see SELVADURAI, A. P. S.

SLEEMAN, B. D., and TUMA, E. Bounds for Wave-Front Solutions to the Fitzhugh–Nagumo equations 439

SMITH, G. D., and CURRIE, P. K. Influence of an In-Plane Magnetic Field on the Stability of Shear Flow of Nematic Liquid Crystals. 297

SMITH, S. H. Accelerations Induced by a Radial Outflow 65

TAO, L. N. The Analyticity of Solutions of the Heat Equation with Nonlinear Boundary Conditions 447

TAYLOR, C., see GARDNER, M.

TING, T. C. T. Elastic Wedge Subjected to Antiplane Shear Tractions—A Paradox Explained 245

TUMA, E., see SLEEMAN, B. D.

UKEJE, E., and CHADWICK, P. Energy Relations for Shock Waves in Elastic Materials 497

WALTON, I. C. The Effect of a Shear Flow on Convection Near a Two-Dimensional Hot-Patch 561

WANG, C. Y. Load Capacities of Floating Elastic Sheets of Finite Width 257
